JUAN CRUZ BERTÍN

REGISTRY / N2A- HOLDER

record the scientific reports of the doctors who will analyze the

Products; d) to maintain custody of the Products and analyzed samples, for re-analysis the following day at the same conference, where the new results will be recorded, and e) to ultimately maintain custody of the Products and samples, in order to deliver them to the appropriate health authority and/or fiscal institution. I read the document to the appearing party, and he/she signs before me; I attest.

JUAN CRUZ BERTIN  
National Notary Public  
REGISTRY N 27 - HOLDER N 27 - HOLDER

SECOND: Immediately thereafter, at 8:20 hours, I present myself at the address of the La Pirámide pharmacy, located at 360 Ciudad del Rosario Street in this City, accompanied by the appearing party. The appearing party then requests, from the person in charge of the business to whom I present myself and explain my purpose, the medications, which are subsequently delivered to me and are recorded in the purchase detail identified as follows: "Ticket (Cod. 083) PV N ° 00006 Nro. T. 00037063 ", the following Products: Qdenga Vial (dengue vaccine), Flucelvax Quad. (Influenza vaccine); Physiological solution, ten syringes, and Cados Tot. Caps x 30. - Subsequently, I proceeded to the event hall named "Lo de Peki", located at the intersection of Los Pinos and Los Paraísos streets, Potrero de

## NOTARIAL RECORD

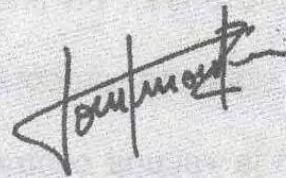

los Funes, Juan Martín de Pueyrredo Department of this province,  
in the company of the appearing party, where it is stated **Principio al congreso**  
referred to in the request, in the presence of approximately fifty people, before  
whom I introduce myself and inform them of my commission. Immediately  
afterwards, the event host, identified as Lic. Lorena Diblasi, introduces  
doctors Liliana Zelada Rück, who presents an Identity Card from  
Bolivia 1069015, and Martín Monteverde, DNI. N 23.848.855, who  
thereafter conduct the analysis of the vials in my possession, which  
are stored in a cooler with cold packs, and which we open in the fol-  
lowing order: first, the diluent for the reconstitution of the dengue  
vaccine, Qdenga, placing a drop on each sterilized substrate and then  
transferring it to an Axon Aquiles II microscope, with dark-field illumi-  
nation, and a Seelang biological microscope, with bright-field and  
frontal light illumination, and then the influenza vaccine Flucelvax  
Quad, repeating the procedure, and observing for approximately one  
and a half hours, after which the doctors issue the following report: "We  
have observed structures consistent with graphene oxide, ribbons,  
microblades, luminous points, and bubbles containing self-assembling  
nanotechnology." The samples are very  
contaminated with particles that exceed the quantity and size declared  
". I have taken photographs of the images observed  
emitted by both microscopes during the entire analysis. These pho-  
tographs will be attached to this testimony and are considered part  
of it. Subsequently, I am provided with the microscope slides con-  
taining the analyzed samples for safekeeping and to be brought

tomorrow for a new analysis to observe any mutations that may occur  
over time. I also continue as custodian of the vials from which the sam-  
ples were extracted, which I continue to keep refrigerated, and of the  
remaining Products acquired, for their preservation for the purpose re-  
quested. With no further facts to record, I conclude my task. I read this  
to Licenciates Lorena Diblasi, Liliana Zalada Rück, and Martín Monteverde  
, who sign in agreement before me. I attest.

Lorena Diblasi
